Answers to the above questions :

Q1. Answer: (a)

India, China, and Bangladesh are the three major producers in the cultivation or production of jute fibre. India has taken advantage of recent improvements in the cultivation of jute to become the largest producer or cultivator of jute in the world. Using advanced production techniques, India also has dominance over the worldwide jute products market.

In terms of the world export of jute fibre, Bangladesh's share is more than 70%, which makes Bangladesh the largest exporter of jute fibre in the world.

Q2. Answer: (a)

Q3. Answer: (d)

Sunrise industry is a colloquial term for a sector or business that is in its infancy but is growing at a rapid pace. A sunrise industry is typically characterized by high growth rates, numerous start-ups and an abundance of venture capital funding.

A sunrise industry is often characterized by a high degree of innovation, and its rapid emergence may threaten to push into obsolescence a competing industry sector that is already in decline. So electronics and biotechnology can be characterized as sunrise industries.

Q8. Answer: (b)

Q9. Answer: (b)

Tummalapalle in Andhra Pradesh could have one of the largest uranium reserves in the world. Recent studies have indicated that it could have a reserve of 1.5 lakh tonnes of scarce material.

Secretary, Department of Atomic Energy, and Chairman of the Atomic Energy Commission Srikumar Banerjee said:

"Studies have already shown that the area had a confirmed reserve of 49,000 tonnes and recent surveys indicated that this figure could go up even three folds." He said uranium deposits in Tummalapalle appeared to be spread over 35 km.

Exploratory works are underway. At present, the country is estimated to have a total reserve of about 1,75,000 tonnes of uranium, apart from this.
